

Algorithm : write a program to sort string in alphabetical order

Step 1 :- Start

Step 2 :- input string

Step 3 :- for $i = 0$ to $i < \text{strlen}(s) - 1$, $i++$
 for $j = i + 1$ to $j < \text{strlen}(s)$, $j++$
 if $(s[i] > s[j])$ then,
 temp = $s[i]$
 $s[i] = s[j]$
 $s[j] = \text{temp}$

Step 4 :- output sorted string

Step 5 :- stop
