

write a programs to implement parameter passing technique

1) Call by Value :-

Algorithm :-

Step 1 :- Start

Step 2 :- $a = b$

Step 3 :- output In function
 $a = _$ and $b = _$

Step 4 :- Stop

func (int a, int b)

Step 1 \rightarrow Start

Step 2 \rightarrow Input $x = 6, y = 8$

Step 3 \rightarrow func (x, y):

Step 4 :- output In main $x = _$ and
 $y = _$

Step 5 \rightarrow Stop

Flowchart :-
